

Resume Detective

Please click the banner above to download your copy.

➔ ● Free Resume Grabber

Resume Detective is a completely **free** program that looks for resumes on the web. If you are a **recruiter, staffing specialist, or hiring manager** looking for resumes on the web, Resume Detective is for you.

● Portal & Newsgroup Resume Search

Resume Detective sends your resume request (search criteria) to major search engines as well as the DeJaNews resume.archive to retrieve any resumes meeting your criteria. All you need to provide is a location (city, state, province, and/or country) and one or more skills and/or job titles.

● Resume Bank Search

Resume Detective will also find resumes stored in on-line resume banks, although not all support and/or boolean logic. Resume banks that Resume Detective will search are updated on this website weekly.

● Non-Stop Worker

Resume Detective does the labor for you by searching the resume sites automatically. It manages the results from the searches and lets you **concentrate on analysis** rather than navigation of the engines. You are able to view the resumes, edit them, weed out those of no interest, while at the same time Resume Detective looks for more. Resume files are not duplicated.

● View the Results

While Resume Detective is finding resumes, you can view those that have been automatically downloaded. The keywords you specified are highlighted in the text so you know at a glance if you have a suitable candidate.

● Resume Export

Once Resume Detective has found the resumes you need, you can export them directly into a resume processor or recruitment system such as the Resume Assistant or IRIS, the Intelligent Resume Input System.

● Screen Shots

Resume Detective uses a very simple user interface. Just supply a couple of keywords and hit the search icon.

● The Future

This first, free version of Resume Detective is yours to keep and use indefinitely. **Visit this page often** to get updates on more free and subscriber resume banks. Upgrades will include resume ranking, emailing, filtering and access to subscriber databases. In the meantime, please feel free to use the power of Resume Detective. If you prefer, subscribe to our [mailing list](#) for further information when Version 2 becomes available.

● Downloads

● Resume Detective 1.3

First download version 1.3 of Resume Detective (14-June-1999).

Then run the RDI.EXE program from your download folder to install Resume Detective. Click [here](#) to find out what's new in this release.

● Resume Detective 1.4

Will be available in early October. More free resume banks have been added - now totalling over 40 sites.

● Resume Bank Update

Download the latest set of portals and resume banks (as of 14-June-1999) if you have **not** downloaded the latest version first. (*Note: Please unzip directly into the RESUME DETECTIVE/RULES subdirectory.*)

● Upgrade from an Earlier Version

To upgrade from version 1.1 or 1.2, just download & reinstall Resume Detective.

● Suggestions

Please feel free to [email us](#) with your suggestions on how to improve Resume Detective, or if you'd like a favorite, free resume bank added to those being searched.

"FOR IMMEDIATE RELEASE "

June 28, 1999

RESUME DETECTIVE

Free software for acquiring résumés from the Web.

Aurora, Ontario, Canada. June 28th, 1999

Knowledge Probe Inc., a developer of software products for the **recruitment industry**, is pleased to announce the release of free software that finds web-based résumés for **recruiters** and **HR** staffers. As a Windows program, **Resume Detective** looks for résumés that have been indexed by search engines, news groups and résumé banks. Users specify the search criteria and Resume Detective brings back the matching résumés.

Resume Detective is designed with **simplicity** in mind. Users need only to supply a state, city or area code along with one or more keywords as the search criteria. Any skill or job title will do the trick. Resume Detective will then request matching résumés from its list of résumé sources. The program currently lists about two dozen websites where it will find résumés.

A simple query for "NY" and "Java" will find the locations of over 500 résumés in less than 20 seconds. As the résumés are automatically being downloaded, a user is able to simultaneously browse them. Duplicate résumés are rejected. As each résumé is viewed, the selected **keywords are highlighted for easy recognition and analysis**. Both the search queries and the search results may be stored as projects for continued re-use.

Essentially, Resume Detective is a tool that eliminates the (mouse) "click" – "click" – "click" drudgery of manually interfacing browsers with the results of résumé searches. This means that recruiters are able to locate and view résumés in minutes rather than hours or even days. By querying all the sources at the same time, the benefit is increased productivity for the résumé researcher with **quality time spent on analysis** rather than searching.

Designed to work with a résumé processing or on-line recruiting system, Resume Detective can feed the system with the résumés it finds. Recruiters can view the résumés, discard those of no interest and export those they like. By defining a **companion application**, the user sends suitable résumés to the recruiting system for processing and on-line storage. Resume Detective has a seamless interface with two recruiting products.

Knowledge Probe is planning to maintain a **weekly list** of résumé banks and résumé locations that Resume Detective will search. While Version 1 is free, the next major release of the product will be licensed. At that time it will handle extraction of résumés from all of the most

popular subscription-based résumé banks.

Knowledge Probe Inc. produces a variety of software for recruiters, including **Resume Assistant, The Recruiter 4 Windows** and **IRIS – The Intelligent Résumé Input System**.

For now, recruiters may find **Resume Detective** a useful tool in their quest for candidates. Best of all, it's **free**.
